

ZEN TECHNICAL TIP #43

DIFFERENCES BETWEEN STARTER DRIVES WITH AND WITHOUT RUBBER SEALING

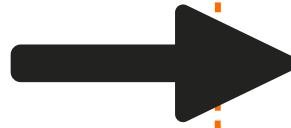

The starter drives below are physically similar and their dimensions are identical, but they are not interchangeable.

Does not have rubber sealing.

Contains rubber sealing given the wet application.

ITEM DISCONTINUED

0652

1198

Do not utilize items 0629, 0649, 0650, 0651 and 0652 in place of the respective pairs 1194, 1195, 1196, 1197 and 1198 since the drive will quickly lose its function given the contamination by oil.

When in doubt, use the drives 1194, 1195, 1196, 1197 and 1198.
