

## TECHNICAL TIP ZEN #25

### DIFFERENCES BETWEEN STARTER DRIVES 0985 AND 1112:

Although 0985 and 1112 have similar physical characteristics, these drives are different. The difference is where shift lever fork slides onto drive:

Starter 0985

13mm opening

Starter 1112

8mm opening

If you try to apply one for the other, the fork will not fit.
